

LB492
Week 6

M. Susan Lindee, *Suffering Made Real*, 1997, Chapters 8, & 9.

Q.1. What role did Scott Matsumoto play in the ABCC? Was it important that he was Nisei (second-generation Japanese American)? If so, how? (pp. 154~156)

Q.2. What impact did *Luckey Dragon Five* incident make on the Japan-U.S. relation? (pp. 156~159)

Q.3. Scientists at the ABCC made important distinctions between “major” and “minor” mutations. How did they define the following conditions—“major,” “minor,” or not genetic? What was the ABCC scientists’ rationale for each definition?

sterility (p. 176~)

early spontaneous abortion (p. 181~)

epididymal cysts (p. 188)

inguinal hernia (p. 188~)
